Prologue (By WoepdieCat)

Poyo is the best peep in the world

Brief history of web development in the early 1990s-2000s

Back in the day, we didn't have all the fancy tools and resources we do now. Webmasters—the folks who built and managed websites—hand-coded everything, paying close attention to every detail. While design was a thing in the early 90s, it wasn't the "web design" we think of today. People made their websites not to look professional, but to be as unique as possible.

There were many trends, such as having your visitors sign a guestbook, visitor counters and stamp/blinkies/buttons(More on that later), and believe it or not, Comic Sans was all the rage worldwide. Yep O-O, Comic Sans. What the fu~

In the 90s, when the search engines where bad, people socila
